Our projects

PRR Project Support for Decarbonization nº357

Beneficiary Entities

COMPONIT

Cofinanced by

PRR Plano de Recuperação e Resiliência

REPÚBLICA PORTUGUESA

Financiado pela União Europeia NextGenerationEU

This project involves reducing the carbon intensity of Componit's manufacturing unit, through the incorporation of cutting-edge, low-carbon technologies, as well as the development of innovative solutions, aiming to obtain final products from a more sustainable production process. . The project's objectives will be achieved through the incorporation of renewable energy and a "cleaner" production process. Concisely, the measures to be implemented at Componit's manufacturing unit will contribute to reducing the company's carbon footprint, aiming for a more sustainable value chain.

Objectives

Reduced dependence on grid energy and reduced GHG and CO2 emissions.

Results

Estimated annual decrease in greenhouse gas emissions (Target to Achieve: 276 Tons of CO2 equivalent); Annual decrease in final energy consumption (Target to Achieve: 277 Tons equivalent); Installed power in Production Units for Self-Consumption (UPAC) (Target to Achieve: 994 KWp)

Technical data sheet

Project name

PRR Project Support for Decarbonization nº357

Main Purpose

Reduced dependence on grid energy and reduced GHG and CO2 emissions

Beneficiary Entities

COMPONIT, LDA

Start date

21/08/2023

End date

20/08/2025

Total eligible cost

3 071 400,00€

European Union financial support | FEDER

1 487 380,00 €
